REVIEW ARTICLE

55 Nutrigenetics and nutraceuticals: the next wave riding on personalized medicine
M. T. Ravi Subbiah, Cincinnati, Ohio

ORIGINAL ARTICLES

62 Immunologic response enhances atherosclerosis—type 1 helper T cell (Th1)-to-type 2 helper T cell (Th2) shift and calcified atherosclerosis in Bacillus Calmette-Guerin (BCG)-treated apolipoprotein E-knockout (apo E^{-/-}) mice
Yoshimi Shibata, Hiroyoshi Ohata, Makiko Yamashita, Shoutaro Tsuji, John F. Bradfield, Akihito Nishiyama, Ruth Ann Henriksen, and Quentin N. Myrvik, Boca Raton, Fla and Greenville and Caswell Beach, NC

70 Urokinase-type plasminogen activator deficiency (uPA–KO) prevented carotid artery ligation-induced vascular remodeling in mice
Baby Martin-McNulty, Lening Zhang, Valdeci da Cunha, Jon Vincelette, John C. Rutledge, Ronald Vergona, Mark E. Sullivan, and Yi-Xin Wang, Richmond and Davis, Calif

76 Hemodynamic and molecular response to intermittent hypoxia (IH) versus continuous hypoxia (CH) in normal humans

85 Two novel uroporphyrinogen decarboxylase (URO-D) mutations causing hepatoerythropoietic porphyria (HEP)
John D. Phillips, Frank G. Whitby, Beth M. Stadmueller, Corwin Q. Edwards, Christopher P. Hill, and James P. Kushner, Salt Lake City, Ut

92 Hemochromatosis (HFE) gene splice site mutation IVS5+1 G/A in North American Vietnamese with and without phenotypic evidence of iron overload
Michael Steiner, Catherine Leiendecker-Foster, Gordon D. McLaren, Beverly M. Snively, Christine E. McLaren, Paul C. Adams, and John H. Eckfeldt, Rostock, Germany; Minneapolis, Minn; Long Beach and Irvine, Calif; Winston-Salem, NC; London, Ontario, Canada; and Minneapolis, Minn

96 Correlation of K-ras codon 12 mutations in human feces and ages of patients with colorectal cancer (CRC)
Chih-Cheng Chien, Shu-Hung Chen, Chen-Chiung Liu, Chia-Long Lee, Ruey-Neng Yang, Shung-Haur Yang, and Chi-Jung Huang, Neihu, Hsinchu, Taipei, and Hsi-Chih, Taiwan
