Special Issue: Organoid Models in Translational Research

1 Kidney organoids: a pioneering model for kidney diseases
Murat Tekguc, Ronald C. Van Gaal, Sebastien G.M. Uzel, Navin Gupta, Leonardo V. Riella, Jennifer A. Lewis, and Ryuji Morizane, Boston, and Cambridge, Massachusetts

18 Modeling infectious diseases of the central nervous system with human brain organoids
Thanhtrige Thiunuwan Priyathilaka, Collin James Laaker, Melinda Herbach, Zsuzsanna Fabry, and Matyas Sandor, Madison, Wisconsin

36 Human lung organoids as a model for respiratory virus replication and countermeasure performance in human hosts
Caitlin E. Edwards, Aleksandra Tata, and Ralph S. Baric, Chapel Hill, and Durham, North Carolina

46 Engineering approaches for cardiac organoid formation and their characterization

68 Importance of multiple endocrine cell types in islet organoids for type 1 diabetes treatment
Emma S. Heaton, and Sha Jin, Binghamton, New York

84 Next generation patient derived tumor organoids
Enrique Podaza, Hui-Hsuan Kuo, John Nguyen, Olivier Elemento, and M. Laura Martin, New York, New York

98 Retinal organoid light responsivity: current status and future opportunities
Jessica R. Onyak, M. Natalia Vergara, and Jordan M. Renna, Akron, Ohio, and Aurora, Colorado
